Skills

- JavaScript | TypeScript | PostgreSQL | MongoDB | Node | Express | React | Vue | Redux | jQuery | NoSQL | Git | Scrum
- Frontend | Backend | Full-Stack (Frontend Heavy) | English C1 (Advanced), Spanish Native

Experience

Finanzas Personales

Final / Group Project

06/2022 – 07/2022

- A Web App designed with the aim to facilitate the manual management of one's personal finances. It allows account creation and login with Google Auth and natively and features 2 table views for input and output, Graph Views, Reviews, Admin Tab and other functionalities.
- I collaborated along with 5 colleagues on data management for the front end and took lead of a refactorization addressing a potential issue with the organization of the data, saving many hours of work and headache in the process.
- I handled the controlled forms for the input fields in the different tables and the Category creator
- Tech used: Typescript | React w/ Redux Toolkit | MongoDB | Express

Henry-Dex

Individual Project

05/2022 – 06/2022

- A Web App that consumed the PokeAPI API to display information about every Pokémon. Additionally, the app allowed the user to create their own Pokémon and store them in a PostgreSQL database.
- During the development and design of the App I devised a non-standard method to apply overlapping filters which I later helped implement in the Bootcamp's Final Project.
- While the assignment was to bring the first 100 elements of the API, I took the liberty to go one step further and utilize the entire API to display all the 905 standard Pokémon divided by pages. It may have been more difficult to do so, but that added up points to the project.
- Tech used: NodeJS | React w/ Redux Toolkit | PostgreSQL | Express

Education

Full Stack Developer

Soy Henry

BA, Argentina 03/2022 – 07/2022

- 4-month long Full Stack Developer Intensive Bootcamp in which you learn from the ground up all you need to know in order to develop complex web pages and apps.
- Technologies learned: JavaScript | TypeScript | PostgreSQL | MongoDB | Node | Express | React | Vue | Redux | jQuery | NoSQL |
- Techniques learned: Scrum | CI/CD | Good Practices | Git

Audiovisual Producer

UNTREF

BA, Argentina 03/2021 – 10/2021

- Incomplete career as an Audio-visual Producer in which I participated in a Group Project simulating the logistic process of the production of a short film.
- Learned: Teamwork | Organization | Time Management
